Project Design Phase-2

Customer Journey

DATE	10 OCTOBER 2022
TEAM ID	PNT2022TMID38806
PROJECT	IOT Based Smart Crop Protection System For Agriculture
MARK	2 MARK

Journey Steps Which step of the experience are you describing?	Discovery Why do they even start the journey?	Registration Why would they trust us?	Onboarding and First Use How can they feel successful?	Sharing Why would they invite others?
Actions What does the customer do? What information do they look for? What is their context?	major finnancial losses, observe the crop safty	production environment and manage these ina economically and produce resource at the product	to connect the increase demand for food system with sensor with minimum resource on mobile such water	to get conserving biodiversity and nutrients in the earth, lowerthe food costs
Needs and Pains What does the customer want to achieve or avoid? Tip: Reduce ambiguity, e.g. by using the first person norrator.	prevent crop damage from diseases and products from the diseases and	to have enough knowledge on handle the loT based devices	farmer have to handle it regular checking	sharing there ideas to other farmer to improve our crop- production and food quality and production
Touchpoint What part of the service do they interact with?	devices are connected through IoT system	mobile devices connected by sensors	buzzer notificatio tape the sound mobile sensor	build farmer minimum support support environment crops prices for all tall shocks
Customer Feeling What is the customer feeling? Tip: Use the emoji app to express more emotions	©	©	©	©
